

# Tracking US Coronavirus Testing Capacity

VOLUME 1, ISSUE 03

JANUARY 12TH, 2021

## ■ Current National Capacity Projections (Tests / Month)

**205M**

December 2020

**258M**

January 2021

**686M**

March 2021

**1,075M**

June 2021

Please note that 2%, 32, and 42% of the future capacity in January, March and June are dependent on the FDA issuing new EUAs from large capacity manufacturers including Roche, Innova, Siemens, Cellex, and E25Bio. All of these are no-instrument lateral flow rapid antigen tests.

## What Happened Last Week

- FDA Issued three new Emergency Use Authorizations (EUAs), including two new serology tests and one new central lab antigen test from [Quanterix](#).
- The FDA has recently advised that mutations in the coronavirus's genetic code could trigger [false negative results](#) in PCR tests.
- CDC is collaborating with Illumina and Helix to use Next Generation Sequencing (NGS) to [detect emerging variants](#) of SARS-CoV-2.

## What to Watch for this Week

01/11/2021

- Massachusetts announced plans to implement [pooled PCR surveillance testing in K-12 schools](#), the first program of its kind in the US. This builds on individual town pilots and a statewide deployment Abbott BinaxNOW tests. This effort could drive continued expansion of pooled PCR testing products and the operational and software services necessary to implement school testing programs. This follows California Governor Newsom's proposal for a [\\$2 billion incentive package](#) for CA elementary schools to reopen.

- Current major providers of pooled testing include:
    - [Broad Institute](#) - Pooled AN Swabs
    - [Concentric by Ginkgo](#) - Pooled AN Swab
    - [Mirimus Clinical Labs](#) - Pooled saliva with automatic reflex
    - [Poplar Health](#) - Pooled AN Swabs
- 

## New & Noteworthy

### *Increased focus on monitoring new SARS-CoV-2 variants*

- [Genomic analysis](#) of community wastewater samples was able to detect mutations characteristic of SARS-CoV-2 variants (B.1.1.7 and 501.V2), demonstrating that this technique may serve as a tool to detect and monitor the circulation of diverse viral lineages.
- The new variant is a serious threat. Mara Aspinall and Dr. Jonathan Quick describe [five key questions](#) that need to be considered to determine how the new variant will impact public health response.

### *More field studies emerge measuring test quality*

- An [investigation](#) from Yale demonstrated that saliva viral load was superior to nasopharyngeal viral load as a predictor of COVID-19 severity and mortality.
  - A newly published [study](#) found that several high-throughput commercial antibody tests are significantly less accurate than reference lab tests and should not be used to assess if a person has antibodies that protect them from COVID-19.
- 

## Food for Thought

- The Vermont Department of Health confirmed CDC's recommendation for shortened quarantine for anyone exposed to SARS-CoV-2 who tests negative on a RT-PCR test 7 days after exposure after an [assessment](#) found that no asymptomatic individuals who tested RT-PCR negative at day 7 post-exposure later tested positive.
- In 2020, the FDA authorized 19% of commercially available tests worldwide, authorizing significantly fewer antigen and antibody tests than other nations. [The Testing Commons Year in Review](#) provides details on last year's authorizations.
- In response to the [CMS reimbursement change](#) that incentivizes 48-hour turnaround, one industry source reports that 76% of PCR tests and 92% of labs will meet the 48 hour turnaround.

# Latest Monthly Capacity Estimates

Please note that 2%, 32, and 42% of the future capacity in January, March, and June are dependent on the FDA issuing new EUAs from large capacity manufacturers including Roche, Innova, Siemens, Cellex and E25Bio. All of these are no-instrument lateral flow rapid antigen tests.

<b>Estimated Monthly Capacity of All Tests (M)</b>								
Test Type	Sep 2020	Dec 2020	Jan 2021	Feb 2021	Mar 2021	Apr 2021	May 2021	Jun 2021
Antigen Point of Care EUA Today	36	95	111	138	155	167	181	196
Home DIY EUA Today	0	2	7	11	14	35	36	40
PCR Point of Care EUA Today	5	6	9	11	13	13	13	15
<b>Subtotal POC &amp; Home EUA Today</b>	<b>41</b>	<b>104</b>	<b>127</b>	<b>161</b>	<b>181</b>	<b>215</b>	<b>230</b>	<b>250</b>
